

Matthew Walsh is an experienced Biology educator and laboratory professional with a strong background in science instruction, curriculum development, and laboratory management. He has over 10 years of teaching experience, including implementing STEM, NGSS, and problem-based learning strategies, and co-teaching with special education staff. He is a Level 1 Google Certified Educator and has led professional development sessions on Google applications. In addition to teaching, Matthew has extensive laboratory management experience, including training residents, performing molecular diagnostics, and maintaining laboratory quality standards. His educational background includes a B.S. in Biological Sciences, a Post-Baccalaureate Teaching Certification from the University of Washington, and additional coursework in geosciences and education. Key skills include curriculum design, differentiated instruction, laboratory procedures, molecular techniques(PCR, DNA extraction), and educational technology. He is committed to student success, professional growth, and integrating technology into science education.
