

Ebony Robinson is an experienced IT professional with over two decades of expertise in systems and network administration, help desk support, and project management within academic and legal institutions. Currently serving as an Information Technology Administrator at UNH School of Law since 2014, she manages infrastructure hardware and software, including servers, network systems, security, and campus-wide applications, supporting a diverse user base of faculty, staff, and students. Her previous role as Associate Director of Computer Services at the same institution involved supporting multi-platform environments, leading campus network initiatives, and transitioning infrastructure from Novell to Microsoft systems. Ebony possesses extensive knowledge of various operating systems, server platforms, networking protocols, and hardware, with strong skills in system security, virtualization, and content management systems. She holds a Bachelor of Science in Exercise and Sports Sciences and has a proven track record of self-motivation, organization, and creative problem-solving in evolving technological landscapes.
